

Upholstery Prespray

Premium Upholstery Prespray Detergent

FT468 Upholstery Prespray is a professional upholstery prespray detergent formulated specifically for the effective cleaning of all synthetic upholstery fabrics. It delivers outstanding grease cutting performance and stain removal ability for reliable and fast cleaning results.

BENEFITS

- **Upholstery Soil Removal** – Upholstery Prespray employs a carefully chosen selection of solvents and emulsifiers to effectively release and suspend the tough organic and oily greasy soiling typical to upholstery.
- **Stain removal** – The addition of a unique stain removing compound releases many stains which other products leave behind. The net result is less spotting afterwards.
- **Free Rinsing** – the Upholstery Prespray formulation has been carefully engineered to emulsify rapidly with the rinse water ensuring minimum residual chemical and maximum soil removal.
- **Fibre Safe** – Upholstery Prespray is self-neutralising and is safe for use on all synthetic fibres.
- **User Friendly** – low odour formula – pleasant to use.
- **Fragranced** – a fresh citrus fragrance compliments the cleaned upholstery.

WHERE TO USE

Ideal for use wherever there is dirty synthetic upholstery, however it finds special application in restaurants, hotels, cinemas, institutions and government buildings.

Use FT464 *Fine Fabric Shampoo* when cleaning fabrics constructed with cotton, silk and other delicate fabrics.

DIRECTIONS

Always pre-test in an inconspicuous location for substrate sensitivity to chemicals.

Dilution:

1. Vacuum fabric to remove all loose soil.
2. Mix 250ml **Upholstery Prespray** with 4 Litres clean water. (1:16)
3. Spray apply this solution onto the fabric until it is wetted out. (1 Litre of ready to use solution should cover approximately a 4 seater lounge suit or 4m²)
4. Agitate solution using a bonnet mitt or an upholstery cleaning brush.
5. Rinse extract using Fine Fabric Rinse.
6. Brush to re-align fibres.
7. Allow to dry. Assist drying by increasing ventilation.

TIP: Prespray severely soiled areas such as chair arms with FT 480 Power Solv for even faster results.
